● Page Listing (Navigation)

--	--	--	--	--	--	--

● Subcategory Pages (Secondary Navigation)

- Interior Page Listing (Navigation) : These boxes represent your site's main navigation or menu. Fill them in to represent the main pages within your website. Your navigation will be visible from all of your pages (generally at the top of your page)
- Subcategory Pages (Secondary Navigation) : These are subcategories to your main navigation. They are generally organized within a drop down menu. When clicked on, these items will take the viewer to an actual page. We use subcategories as a way to keep your site clean, organized, and easy to use. NOT ALL SITES REQUIRE SECONDARY NAV.
